[Project Number: 2021-1-IT01-KA220-VET-000032968]

About the Project

Climate change concerns everyone and is a very real threat to global society, affecting millions of people and causing natural disasters all over the world. The European Union is taking a stand against climate change and for a greener future, launching several initiatives such as the European Green Deal. The GreenVETChoices project joins the fight for a healthier planet by developing and implementing an innovative learning methodology to increase green skills and raise interest in green vocational education and training. VET professions offer rich opportunities for individuals interested in green technologies, green entrepreneurship, green social business, and related environmentally conscious industries. These professions play a key role in the pursuit of a healthier environment and green growth in European economies.

Project Results

Project Result 2: Green VET Choices Virtual Portal

The GreenVETChoices Virtual Portal is an open and participative learning environment that uses a motivating storytelling approach to empower users to make their own decisions and find out more about green careers.

The Virtual Portal is now available: <https://greenvetchoices.eu/e-learning/>.

Environmental Stories

Welcome to the project's interactive stories! The following stories represent real-life environmental challenges and opportunities that Europe is currently facing. Through this innovative approach to learning, the participants will be immersed in 24 different worlds. Through scenario-based questions, each story provides valuable insights into possible careers that arise and opportunities that are available in green VET professions in each partner country. Digital skills and competencies are fostered through challenge-based scenario technique stories which bring users to individual story endings. The badge validation learning framework motivates individuals towards the positive outcome of each story.

Learning Outcomes

Upon completion of the Environmental Stories, learners will:

- Be in a position to identify environmental challenges that our societies are facing
- Understand how energy demand and efficiency are an essential part of our environmental policy
- Familiarise with several processes that our activities impact our natural environment and their consequences on biodiversity
- Be in a position to classify several practices and their various steps that contribute towards the circular economy model
- Be able to distinguish possible green VET career directions through the story development
- Be motivated towards adopting sustainable habits in our daily lives.

Project Result 3: Green VET Choices Digital model

The GreenVETChoices Digital Model encompasses a professional magazine and a key segment video anthology introducing the innovative methodologies and didactical concepts applied in the project and presenting keynote articles by experts.

The digital model is now available in English: <https://greenvetchoices.eu/digital-model/> Keep an eye on the platform, as it will be made available in all partner languages in March.

Meeting in Virginia

The GreenVETChoices partners met in Virginia, Co. Cavan in Ireland on the 5th and 6th of October 2023. The purpose of this meeting was to finalise the Green VET Choices Virtual Portal and to plan the next steps for the GreenVETChoices Digital Model and the upcoming Multiplier Events of the project!
